BOSS

This LED indicator shows when the effect is ON and when to change battery.

Three controls of level, tone and distortion create varied and attractive sound effects.

The slim, aluminum-diecast body is rugged to last longer.

PD-1's exclusive warp switch, when pressed hard, puts out the outstanding sound effect of boosted distortion.

The electronic volume control using a hall element eliminates unpleasant noise inherent to mechanical volume controls.

The FET electronic switch is free from click noise, works positively and built rugged to stand severe abuse.

Special pedal action for fast, positive operation.

Electronic volume control with a hall device eliminates the noise associated with conventional pedals.

PD-1 Rocker Distortion

Distortion level can be changed with the pedal. The warp switch provides powerful distortion when you need it most.

- Power: 2 x 1.5V Battery, AC Adaptor • Current draw: DC3V, 40mA • Input impedance: 470k Ω • Output load impedance: Over 10k Ω • Maximum Gain: 43dB (62dB warp switch activated) • Dimensions: 110(W) x 65(H) x 320(D) mm (4.3" x 2.6" x 12.6") • Weight: 1.5kg (3.3 lbs.)

PV-1 Rocker Volume

Clear sound and troublefree operation. A +20dB gain is adjustable with the max. level control for use as a pedal booster.

- Power: 9V Battery, AC Adaptor • Current draw: DC9V, 5mA • Input impedance: 470k Ω • Output load impedance: Over 10k Ω • Max attenuation: Over 80dB • Dimensions: 110(W) x 65(H) x 320(D) mm (4.3" x 2.6" x 12.6") • Weight: 1.3kg (2.86 lbs.)

PW-1 Rocker Wah

A range switch allows three-stage setting of wow sound. In addition, the wide control allows subtle setting of wow effect range.

- Power: 2 x 1.5V Battery, AC Adaptor • Current draw: DC3V, 50mA • Input impedance: 470k Ω • Output load impedance: Over 10k Ω • Dimensions: 110(W) x 65(H) x 320(D)mm (4.3" x 2.6" x 12.6") • Weight: 1.3kg (2.86 lbs.)
